SUPPLEMENT I TO EXRAND-M-37

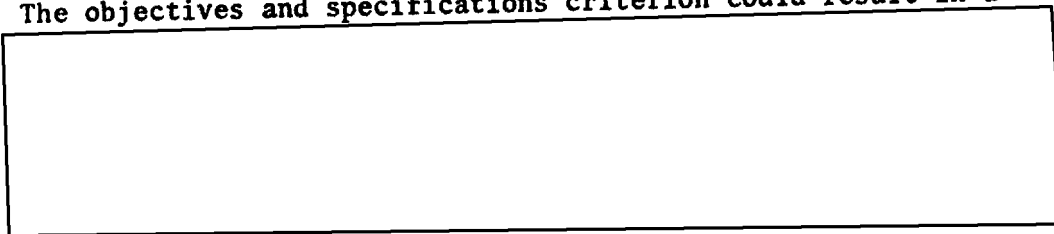

SUBJECT: Free Radical Materials Briefing on 21 October 1970

1. Four Free Radical material types were briefed by [redacted] at the meeting. All members have details and an unclassified handout presented at the meeting.

25X1

2. This paper presents a summary statement concerning the predicted performance of the Free Radical acquisition material, one of the four materials briefed on.

3. On the basis of the NRO Representative's assessment (as opposed to the quotation of the contractor personnel at the meeting) the program objectives under the contract provides for material having suitable characteristics for satellite acquisition. The objectives and specifications criterion could result in a

4. According to the contractor, the date of expected readiness of the acquisition material at the earliest is June 1971 for laboratory coated samples, and June 1972 for suitable quantities of materials for operational evaluation.
